

Use Case Template

ChargEV – Smart EV Charging Station Platform

1. Use Case Title	Search Nearby Stations
2. Abbreviated Title	Search Stations
3. Use Case Id	UC-01
4. Actors	EV Driver (Primary)
5. Description	The EV Driver searches for nearby charging stations from the ChargEV Home or Stations page by entering a location or using the current device location.
5.1. Pre Conditions	1. Driver has the ChargEV web app open. 2. Driver has entered a location, or location access is available.
5.2. Task Sequence	1. Driver enters a location or taps "View Stations". 2. System geocodes the location via the Location Services API. 3. System fetches nearby charging stations via the Places API. 4. System retrieves live availability and pricing from MongoDB Atlas for each station. 5. System displays a ranked list of stations alongside a map view.
5.3. Post Conditions	1. A list of nearby stations, with distance, price and availability, is displayed to the driver.
6. Modification History	Date: September 18, 2026
